Subject: Microsoft Settlement

To Whom It May Concern:

Many others have eloquently voiced their opposition to the proposed settlement. I cannot hope to express the same concerns as well in a brief email.

I am against the proposed settlement because I do not feel it goes far enough in restricting the anti-competitive practices that currently allow Microsoft to maintain a monopoly position in the desktop operating systems market. Further examples of these practices are evident in software releases subsequent to the court findings, further justifying the need for strong measures that cannot be circumvented by Microsoft's interpretations of loose wording.
